7.  Examiner's Amendment/Comment
8.  Examiner's Statement of Reasons for Allowance
9.  Other \_\_\_\_\_.

**DETAILED ACTION**

1. This Office Action is responsive to the Amendment filed on 9/21/07. Accordingly, claims 1, 2, 4-9 and 11 are currently pending; and claims 3 and 10 are canceled.

**REASONS FOR ALLOWANCE**

2. Claims 1, 2, 4-9 and 11 are allowed.

3. References 5081713, 3818364, 5982824, 5687195, 6956432, 6169455, 6480061 and 6552608 are additionally cited because they are pertinent to the claimed invention.

4. The following is an examiner's statement of reasons for allowance:

-Regarding independent claim 1, none of prior art of record teaches or suggests a gain control system, as claimed. Miyazaki (5081713) teaches the claimed gain control system except he fails to teach that the system comprises a summation module that combines a gain reference signal and a gain variation signal to generate the control signal to control a variable amplifier wherein the gain reference signal is calibrated at a reference temperature and a reference frequency. In Miyazaki, the gain reference signal is a detected signal indicating the current output of the variable amplifier, not a signal calibrated at a reference temperature and a reference frequency. It would not have been obvious for one skilled in the art to implement Miyazaki in view of other prior art for leading the implementation to the claimed invention.

-Regarding independent claim 8, none of prior art of record teaches or suggests a method for controlling a gain, as claimed. Miyazaki teaches the claimed method except he fails to teach that the method comprises procedure of combining a gain reference and a gain variation signal to generate the control signal to control the gain wherein the gain reference signal is calibrated at a reference temperature and a reference frequency. In Miyazaki, the gain is a gain of a variable

amplifier, and the gain reference signal is a detected signal indicating the current output of the variable amplifier, not a signal calibrated at a reference temperature and a reference frequency. It would not have been obvious for one skilled in the art to implement Miyazaki in view of other prior art for leading the implementation to the claimed invention.

-Regarding independent claim 11, none of prior art of record teaches or suggests a device, as claimed. Miyazaki teaches the claimed device except he fails to teach that the device comprises means of combining a gain reference and a gain variation signal to generate the control signal to control the gain of a variable amplifier wherein the gain reference signal is calibrated at a reference temperature and a reference frequency. In Miyazaki, the gain reference signal is a detected signal indicating the current output of the variable amplifier, not a signal calibrated at a reference temperature and a reference frequency. It would not have been obvious for one skilled in the art to implement Miyazaki in view of other prior art for leading the implementation to the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
